

Glass balustrades are the ultimate means of creating a safety barrier for a balcony, pool or staircase. While providing safety, strength and security in and around your home, glass simultaneously offers uninterrupted views, style, spaciousness and long-lasting quality.

The Ultra range of EasySpigots are designed for side or top fixing glass balustrade. Manufactured from high grade stainless steel, they are produced in a range of finishes and colours.

EasySpigot is manufactured to accommodate a range of glass thicknesses from 12mm up to 25mm. The base of the spigot can be securely fitted to concrete, timber or steel with the threaded bar provided using chemical anchor or washer and nut.

## ULTRA EASYSPIGOTS ARE HEIGHT AND PLUMB ADJUSTABLE

Ultra EasySpigots are CNC manufactured from 304/316 grade stainless steel and make use of stainless steel and ABS complimentary components. They can be either brushed or polished, powder coated, or Ultra Hardcoated in a colour of your choice.

EasySpigots are stocked for 12mm toughened glass, with a 20mm stand-off distance for side mount, and a 50mm stand-off distance for top mount, or they can be custom manufactured to the customer's requirement.

Available in top mount and side mount, as well as round and square versions.

EasySpigots do not require the glass to have holes and are height and plumb adjustable.

Technical drawings, and installation diagrams are available on request.

Complete your desired look or safety requirement by choosing from a range of handrails in a variety of materials, shapes, colours and sizes.

## ADVANTAGES OF THE ULTRA EASYSPIGOT:

- Quality CNC Machining
- Manufactured from corrosion resistant materials
- Brushed, polished, powder coated or Hardcoated in colour
- Height and plumb adjustable
- Suits 12mm to 25mm glass (12mm standard)
- Custom manufacture available
- Competitively priced

Ultra EasySpigots have been tested to conform with SANS requirements, with the appropriate fixing and glass thickness, in both residential and commercial installations. However due to the variety of installation methods, fixings, substrates, glass thicknesses and handrail alternatives SANS regulation requires that every balustrade installation be individually tested for the intended purpose and signed off by a Competent Person Glazing Category 1 or structural engineer, which is the installer's responsibility and does not form part of our product.
