ULTRA HANDLES & ESCUTCHEONS

The Barcelona knob handle is a stylish back-to-back handle set, specifically designed for use on shower doors, frameless doors, and various other glass products. It is crystal clear, providing a sleek and minimal visual impact when fixed through the glass.

When installed, the Barcelona knob handle offers a sleek, modern look that complements the clean lines of the glass. The clear finish not only enhances the aesthetic appeal but also adds an elegant final touch to your glass product, making it stand out while remaining subtle.

THE BARCELONA CLEAR KNOB HANDLE IS EASY TO FIT AND WON'T DISCOLOUR WITH AGE

Barcelona knobs are manufactured using the finest ultra-clear polyurethane. They are cast in a single pour with an aluminium threaded insert to ensure consistency of material and strength.

Once cured the handles are shaped and polished to a high gloss finish. An M6 threaded rod is provided to link the two knobs through glass.

Standard the handles will fit from 6mm to 12mm glass and require a minimum hole diameter of 10mm through glass.

The handles can be tightened by hand for a strong, secure fix.

The polyurethane compound used is UV stable and the aluminium insert comes standard in high gloss mill finish.

Barcelona knob handles are 40mm in diameter and 26mm in height per side.

CUSTOM MANUFACTURE

While the Barcelona handle is an established design, we can custom manufacture a knob handle to suit your requirements (minimum order quantities apply).

Make the knob handle a signature on your product and let us manufacture it just for you.

The Ultra range of flush pull handles is suitable for aluminium or timber sliding doors and windows and will perfectly complement a sleek and minimalist look.

A flush pull handle is recessed into the door, providing a neat, well finished appearance. When powder coated in the same colour as your product they have minimal visual impact.

Ultra flush pull handles come standard in 18 different shapes and sizes and offer soft touch options to minimize pressure on the fingertips.

BEAUTIFUL FLUSH PULLS, CUSTOM POWDER COATED AND INSTALLED WITH ADHESIVE

Ultra flush pull handles are manufactured using 6063T6 aluminium alloy. They are CNC machined and then hand finished to provide a quality appearance.

Each handle is powder coated, Hardcoated or anodized in the desired colour, individually bagged and packed in boxes of 20 for your convenience.

All flush pull handles are 45mm wide and have a recess depth of 12mm.

Handles are fixed to the door using the pre-applied adhesive tape. The absence of a fixing screw and the handles' high resistance to corrosion make Ultra flush pull handles perfect for coastal areas.

Technical drawings, cut out dimensions and installation diagrams are available on request.

ADVANTAGES OF ULTRA FLUSH PULLS:

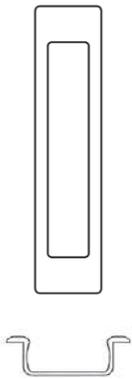

- Quality CNC machining
- 18 standard variations of size and shape
- Manufactured from corrosion resistant materials
- Finishes include powder coating, Hardcoat, or anodizing
- Soft touch options available
- Install using pre-applied adhesive
- Custom manufacture lengths and shapes available
- Competitively priced

PRIMER

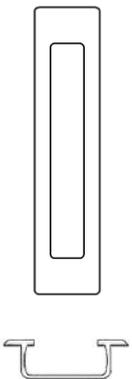

This specially formulated primer is designed to enhance adhesion, ensuring a secure and long-lasting bond between our aluminium flush pull handles and the surfaces they are applied to. We strongly recommend the use of our primer with each installation to ensure optimal adhesion. Free with each box of 20 flush pulls or sold separately.

The Ultra range of escutcheons is suitable for aluminium doors and windows and will perfectly complement a sleek and minimalist look. Ultra escutcheons come standard in 4 different shapes and sizes.

An escutcheon provides a neat, well finished appearance and perfectly blends with the Ultra range of flush pull handles. When powder coated in the same colour as your product they have minimal visual impact.

ULTRA ESCUTCHEONS WITH ADHESIVE BACKING OFFER A SLEEK LOOK POWDER COATED IN THE COLOUR TO MATCH YOUR DOOR OR WINDOW

Ultra escutcheons are manufactured using 6063T6 aluminium alloy. They are CNC machined to the desired shape and size and then hand finished to provide a quality appearance.

Each escutcheon is powder coated, Hardcoated or anodized in the desired colour and individually bagged and packed in boxes for your convenience.

Escutcheons are fixed to the door using adhesive tape pre-applied to the part, ensuring a sleek and minimalist look with minimum visual impact.

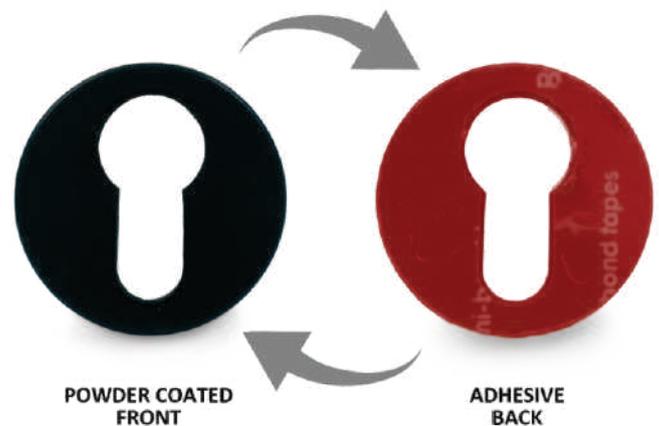

The absence of a fixing screw eliminates the possibility of dissimilar metal corrosion.

Their exceptional resistance to corrosion makes Ultra escutcheons perfect for coastal areas.

Technical drawings, dimensions and installation videos are available on request.

ADVANTAGES OF ULTRA ESCUTCHEONS:

- Easy installation
- Quality CNC machining
- 4 standard variations of size and shape
- Manufactured from corrosion resistant materials
- Finishes include powder coating and Ultra Hardcoat
- Competitively priced

CUSTOM MANUFACTURE

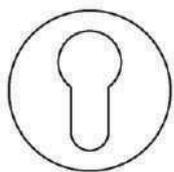

While our escutcheons are available in standard established shapes and sizes, we can custom manufacture them to suit your requirements (minimum order quantities apply). Make an escutcheon to suit your client's needs or a specific design as a signature product and let us manufacture it just for you.

TIP:

Use Ultra Primer with each installation to ensure optimal adhesion.
