

Ultra ES flush pull handles with escutcheon cutout are suitable for aluminium or timber sliding doors. The ES range of flush pulls includes an integrated escutcheon cutout as part of the handle - this means a single cutout with a CNC machine or router, and a clean, precise finish that will perfectly complement a sleek and minimalist look.

A flush pull handle is recessed into the door, providing a neat, well finished appearance. When powder coated in the same colour as your product they have minimal visual impact.

Ultra ES flush pull handles come standard in 2 different shapes with soft touch to minimize pressure on the fingertips.

BEAUTIFUL FLUSH PULLS WITH ESCUTCHEON CUTOUT, CUSTOM POWDER COATED AND INSTALLED WITH ADHESIVE

Ultra ES flush pull handles are manufactured using 6063T6 aluminium alloy. They are CNC machined and then hand finished to provide a quality appearance.

Each handle is powder coated, Hardcoated or anodized in the desired colour, individually bagged and packed in boxes of 20 for your convenience.

Ultra ES flush pull handles are 45mm wide, 300mm high, and have a recess depth of 12mm.

Handles are fixed to the door using the pre-applied adhesive tape. The absence of a fixing screw and the handles' high resistance to corrosion make Ultra ES flush pull handles perfect for coastal areas.

Technical drawings, cut out dimensions and installation diagrams are available on request.

ADVANTAGES OF ULTRA ES FLUSH PULLS:

- Quality CNC machining
- Two standard shape options
- Integrated escutcheon cutout for a neat finish
- Manufactured from corrosion resistant materials
- Finishes include powder coating, Hardcoat, or anodizing
- Custom manufacture lengths and shapes available
- Install using pre-applied adhesive
- Competitively priced
- Soft touch

PRIMER

This specially formulated primer is designed to enhance adhesion, ensuring a secure and long-lasting bond between our aluminium flush pull handles and the surfaces they are applied to. We strongly recommend the use of our primer with each installation to ensure optimal adhesion. Free with each box of 20 flush pulls or sold separately.
